SUMMARY

Senior Frontend Developer specializing in Vue (2/3), with 7+ years building production-ready web applications for SaaS platforms serving 1,000+ users. Experienced in refactoring legacy systems, improving frontend performance, and delivering scalable features in Agile teams. Collaborated closely with cross-functional stakeholders (BA, UX/UI, Backend, QC) and mentored junior developers through code reviews. Looking for a senior-level role where I can contribute to scalable architecture and team growth.

TECHNICAL SKILLS

Frontend: Vue 2/3, Nuxt 2, React, Next.js, JavaScript (ES6+), HTML5, CSS3, SCSS

State Management: Vuex, Redux

Styling: Tailwind CSS, Material UI, Vuetify, Bootstrap, Styled-components

Build & DevOps: Vite, Gulp, Docker, Azure DevOps, GitHub Actions

Backend Integration: REST APIs, Basic Node.js, .NET

Tools: Git, Jira, Figma, Slack

Methodologies: Agile/Scrum, Component-based Architecture, CI/CD

EXPERIENCE

Frontend Developer

Feb 2023 – Present

Joblogic Vietnam – UK-based Service Management SaaS Platform

Contributed to the development and enhancement of a cloud-based service management platform used across multiple industries.

- Developed and maintained 5+ core modules for a SaaS platform with 1,000+ active users, reducing reported UI bugs by ~30% through systematic refactoring.
- Integrated a marketplace module within an existing micro-frontend architecture, collaborating with the team to ensure seamless feature delivery.
- Contributed to a reusable component library and design system using Storybook, building shared UI components for cross-team consistency
- Refactored legacy components to enhance maintainability and reduce performance bottlenecks.
- Leveraged AI-assisted coding tools to accelerate feature development and improve engineering productivity.
- Conducted weekly code reviews and mentored 2 junior developers, both of whom progressed to mid-level within the team.
- Managed source control and CI/CD pipelines using Azure DevOps and GitHub Actions, supporting reliable deployments to Azure.

Tech Stack: Vue 2/3, React, Redux, Tailwind CSS, Material UI, Azure DevOps, GitHub Actions, .NET, Azure

Frontend Developer

Feb 2021 – Jan 2023

Ethan Technology Asia

Worked on multiple client projects for Japanese markets, delivering responsive and maintainable web applications.

- Developed and maintained front-end applications using Vue 2 and Nuxt 2 across various client projects.
- Led a team of 3–4 developers for ~11 months, ensuring on-time delivery across all sprint milestones.

- Mentored 4 fresher developers and 1 junior developer, providing technical guidance and conducting code reviews.
- Designed and implemented interactive user interfaces aligned with client requirements and UX specifications.
- Collaborated closely with backend teams to integrate APIs and ensure application stability.
- Optimized Vue 2 app performance by lazy-loading routes and refactoring Vuex store structure, improving load time by an estimated 25–35%.
- Delivered a 3-month Angular-based web application project, meeting strict client deadlines and quality standards.
- Improved code maintainability through structured state management (Vuex) and adherence to coding standards.

Tech Stack: Vue 2, Nuxt 2, Angular 10, Vuex, SCSS, Vuetify, Laravel, Docker, GitHub Actions

Frontend Developer

May 2018 – Jan 2021

Trancosmos Vietnam

Delivered responsive websites and UI campaigns for Japanese enterprise clients.

- Developed and maintained responsive websites using HTML, CSS, SCSS, and JavaScript.
- Translated PSD and Figma designs into pixel-perfect, cross-browser compatible interfaces.
- Improved website performance by optimizing assets and front-end structure.
- Implemented SEO best practices and ensured accessibility compliance.
- Supported UI campaign projects and website enhancements for multiple client accounts.

Tech Stack: HTML, CSS, SCSS, JavaScript, jQuery, Bootstrap, Gulp
